

## Investment Objective

To invest in the global healthcare sector with the objective of achieving a high level of capital growth. In order to achieve its investment objective, the Company invests worldwide in a diversified portfolio of shares in pharmaceutical and biotechnology companies and related securities in the healthcare sector. It uses gearing, and derivative transactions to enhance returns and mitigate risk. Performance is measured against the MSCI World Health Care Index (net total return, sterling adjusted).

## Five Year Performance (%)

Past performance is not a guide to future performance. The value of investments and the income from them may fall as well as rise and is not guaranteed; an investor may receive back less than the original amount invested.

Net Asset Value per share (total return) +46.6%

Share Price (total return) +57.7%

Benchmark: MSCI World Health Care Index (net total return; sterling adjusted) +47.1%

## Commentary

In March, the NAV per share was down 5.1%, the share price was up 0.5% and the MSCI World Health Care Index was down 0.8%.

The world and the equity markets pivoted in March in response to the COVID-19 outbreak. Whilst investor fears in February were mostly about the ripple effects on the supply chain coming out of China, March brought an official worldwide pandemic and investor panic over a complete collapse of the global economy. As a result, we witnessed some of the most epic and volatile moves in the history of the equity markets. Despite a partial reprieve to market declines in the latter part of the month, Healthcare stocks were most definitely defensive in the period, with the FTSE All-Share Index down 15.1% compared to MSCI World Health Care Index down 0.8%.

And whilst relative NAV performance for the Company was positive in February by over 400 basis points, this unfortunately reversed in March. As volatility spiked to all-time highs, correlation soared, and the market plummeted into bear territory and with it a distinct "risk-off" environment for the equity markets. As a result, small cap biotechnology stocks significantly underperformed in the month, blunting relative performance given our notable overweight positioning there. Large cap pharmaceutical stocks performed the best given the "flight to safety" by investors, again blunting relative performance given our notable underweight positioning there.

The top individual contributor in the month was once again **CanSino Biologics**, the China-based vaccine maker. In March the company announced that its coronavirus vaccine, the leading vaccine candidate in China, had entered a Phase 1 clinical trial. The stock soared over 50% in response. An idiosyncratic key contributor was the on-line private health insurance broker, **eHealth**. The stock performed favourably in March as the company's business of selling Medicare Advantage plans to consumers was largely unaffected by the pandemic and benefited from Joe Biden's emergence as the Democratic nominee for the upcoming U.S. Presidential election. Otherwise, all other notable contributors in March were large cap stocks.

## Risk Warnings

This document is for information purposes only and does not constitute an offer or invitation to purchase shares in the Company and has not been prepared in connection with any such offer or invitation. Before investing in the Company, or any other investment product, you should satisfy yourself as to its suitability and the risks involved, and you may wish to consult a financial adviser.

Any return you receive depends on future market performance and is uncertain. The Company does not seek any protection from future market performance so you could lose some or all of your investment. For information on the principal risks the Company is exposed to please refer to the Company's Annual Report or Investor Disclosure Document available at [www.worldwidewh.com](http://www.worldwidewh.com).

Shares in the Company are bought and sold on the London Stock Exchange. The price you pay or receive, like other listed shares, is determined by supply and demand and may be at a discount or premium to the underlying net asset value of the Company. Usually, at any given time, the price you pay for a share will be higher than the price you could sell it.

The Company has increased its exposure to investments via the use of an overdraft facility and derivatives, and this could potentially magnify any losses or gains made by the Company. The Annual Report and Investor Disclosure Document, available on the Company's website, include further details on the use of, and exposure to, derivatives.

## Biographies

**Sven H. Borho, CFA**, is a founder and Managing Partner of OrbiMed. Sven heads the public equity team and is the portfolio manager for OrbiMed's public equity and hedge funds. He has been a portfolio manager since 1993 and has played an integral role in the growth of OrbiMed's asset management activities. Sven started his career in 1991 when he joined OrbiMed's predecessor firm as a Senior Analyst covering European pharmaceutical firms and biotechnology companies worldwide. He studied business administration at Bayreuth University in Germany and received a M.Sc. (Econs.), Accounting and Finance, from The London School of Economics; he is a citizen of both Germany and Sweden.

**Trevor M. Polischuk, Ph.D.**, is a Partner at OrbiMed focused on the global pharmaceutical industry. Trevor joined OrbiMed in 2003 and became a Partner in 2011. Previously, he worked at Lehman Brothers as a Senior Research Analyst covering the U.S. pharmaceutical industry. Trevor began his career at Warner Lambert as a member of the Global Marketing Planning team within Parke-Davis. Trevor holds a Doctorate in Neuropharmacology & Gross Human Anatomy and an M.B.A. from Queen's University, Canada.

## Portfolio Manager Profile

OrbiMed Capital LLC (OrbiMed) is owned by six principals, including Sven Borho who have between them many years' experience of investing in the pharmaceutical, biotechnology and healthcare sectors. The U.S. based company has over 80 investment professionals who carry out extensive research, involving company visits and evaluating the commercial and scientific prospects for individual drugs. OrbiMed is registered as an investment adviser under the U.S. Securities and Exchange Commission (SEC). SEC registration does not imply a certain level of skill or training.

## Investment Policy

The Company offers a superior UK-listed opportunity for capital appreciation through a diversified portfolio of worldwide pharmaceutical, biotechnology, healthcare equipment, and healthcare services companies. The Portfolio Manager seeks to reduce risk through extensive fundamental research, worldwide exposure, position limits, and balanced market capitalisations. The Company's investment policy allows gearing, through borrowing, of up to 20% of net assets and a net exposure to derivative investments (excluding swaps) of up to 5% of the portfolio. Equity swaps may also be used, counterparty exposure here is limited to 12% of the portfolio at the time of acquisition. Unquoted securities will not exceed 10% of the portfolio at the time of acquisition.

## Discount / Premium Control Mechanism

The Directors have adopted an active discount management policy to establish and support an improved rating in the Company's shares through the use of share buybacks, with a view to limiting the discount to the ex income NAV per share at which the shares trade to no more than 6%. Shares bought back may be held in treasury for reissue at later dates at not more than the discount at which they were purchased, and in any event at a discount no greater than 5% to the prevailing cum income net asset value per share. Any shares left in treasury are cancelled around the time of the AGM. In order to stop the share price trading at a significant premium to the NAV per share, the Company has the ability to issue new shares at a 0.7% premium to the cum income NAV per share.

Worldwide Healthcare Trust PLC conducts its affairs so that its shares can be recommended by independent financial advisers ("IFAs") to retail private investors. The shares are excluded from the Financial Conduct Authority's ("FCA's") restrictions which apply to non-mainstream investment products because they are shares in a UK-listed investment trust.

*Continues from page 1*

The largest detractor to performance in March was the biggest hospital operator in the U.S., **HCA Healthcare**, as the coronavirus crisis forced hospitals across the U.S. to shut down profitable elective procedures and drove patients to defer care in the face of treating the thousands of infected COVID-19 patients. Likewise, in India, the share price for one of the largest hospital chains there, **Apollo Hospital Enterprises**, was lower after the spread of the pandemic eventually reached that nation as well.

Looking ahead, once again, we will be monitoring the world's ongoing response to COVID-19 and the impact to the global markets. Importantly, April will bring the commencement of another quarterly earnings season, the first during the pandemic, and will provide the opportunity to begin to quantify the impact of the coronavirus on our portfolio holdings.
