

Investment Objective

To invest in the global healthcare sector with the objective of achieving a high level of capital growth. In order to achieve its investment objective, the Company invests worldwide in a diversified portfolio of shares in pharmaceutical and biotechnology companies and related securities in the healthcare sector. It uses gearing, and derivative transactions to enhance returns and mitigate risk. Performance is measured against the MSCI World Health Care Index (net total return, sterling adjusted).

Investment Policy

The Company offers a superior UK-listed opportunity for capital appreciation through a diversified portfolio of worldwide pharmaceutical, biotechnology, healthcare equipment, and healthcare services companies. The Portfolio Manager seeks to reduce risk through extensive fundamental research, worldwide exposure, position limits, and balanced market capitalisations. The Company's investment policy allows gearing, through borrowing, of up to 20% of net assets and a net exposure to derivative investments (excluding swaps) of up to 5% of the portfolio. Equity swaps may also be used, counterparty exposure here is limited to 12% of the portfolio at the time of acquisition. Unquoted securities will not exceed 10% of the portfolio at the time of acquisition.

Discount / Premium Control Mechanism

The Directors have adopted an active discount management policy through the use of share buybacks, with a view to limiting the discount to the cum income NAV per share at which the shares trade to no more than 6%. Shares bought back may be held in treasury for reissue at later dates at a premium to the prevailing cum income net asset value per share. Any shares left in treasury are cancelled around the time of the AGM. In order to help prevent the share

Return vs Volatility (5 Years Annualised) – Chart (%)

Commentary

In February, the NAV per share total return was +0.2%, the share price total return was +0.3% and the MSCI World Health Care Index was -0.1%, on a net total return, sterling adjusted basis.

The world's focus in February turned to Eastern Europe and the invasion by Russia into Ukraine, raising global geopolitical tensions and the volatility of equity markets. The VIX spiked above 35 at the month end, as broader markets sold off in the month, with the MSCI World Index falling over 250 bps (sterling). Healthcare stocks overall were modestly defensive, with the World Health Care Index falling only 0.1% in the same period. Otherwise, industry news flow for healthcare was mostly quiet in the month.

Positive performance drivers were diverse in February. Sub-sectors that generated absolute and relative positive returns included large cap pharma, health care services, medical devices, as well as China/India/Japan. The main source of negative contribution was emerging biotechnology stocks, a combination of allocation effect and a single stock with some negative news.

On an individual basis, the largest positive contributor was the managed care company, Humana. The stock reacted positively after the Centers for Medicare & Medicaid Service (in the U.S.) released higher than expected revenue growth rates for Medicare programs for 2023. Other notable contributions came from large cap pharma, AbbVie, Bristol-Myers Squibb, and AstraZeneca were among the top five contributors, with each stock responding well to 2022 guidance during their quarterly reports earlier in the month, following strong momentum moves observed in January.

The largest detractor in February was the small-cap biotechnology company, Mirati Therapeutics. Despite confirmation of the regulatory filing for their lead asset, adagrasib (for the treatment of patients with lung cancer, with the KRASG12 mutation), the FDA granted a "regular" review rather than the expected "priority" review, delaying a potential approval by 6 months. The stock's sell off was exacerbated by a broad sell-off in biotechnology in the month. Another detractor of import was Pfizer. The stock sold off in the month with other "COVID-vaccine" stocks as the omicron fueled infections waned in the U.S and as investor attention has moved past these names.

Looking ahead, near term abatement of geopolitical risk looks unlikely. Pharmaceutical markets in Russia and Ukraine are small (typically 1% or less of revenues for a typical global multinational pharmaceutical company). Continued rising inflation and recession/stagflation fears may keep healthcare stocks defensive. We continue to look for the turn in biotechnology stocks. Possible catalysts include M&A, as many large cap pharma executives talked-up business development priorities during the quarterly reporting period. In terms of U.S. drug price reform, Democratic support continues to fall for President Biden's "Build Back Better" bill. The collapse of this bill – and with it, drug price reform – could help buoy investor sentiment for the group.

price trading at a significant premium to the NAV per share, the Company has the ability to issue new shares at a 0.7% premium to the cum income NAV per share.

Risk Warnings

This document is for information purposes only and does not constitute an offer or invitation to purchase shares in the Company and has not been prepared in connection with any such offer or invitation. Before investing in the Company, or any other investment product, you should satisfy yourself as to its suitability and the risks involved, and you may wish to consult a financial adviser.

Any return you receive depends on future market performance and is uncertain. The Company does not seek any protection from future market performance so you could lose some or all of your investment. For information on the principal risks the Company is exposed to please refer to the Company's Annual Report or Investor Disclosure Document available at www.worldwidewh.com.

Shares in the Company are bought and sold on the London Stock Exchange. The price you pay or receive, like other listed shares, is determined by supply and demand and may be at a discount or premium to the underlying net asset value of the Company. Usually, at any given time, the price you pay for a share will be higher than the price you could sell it.

The Company has increased its exposure to investments via the use of an overdraft facility and derivatives, and this could potentially magnify any losses or gains made by the Company. The Annual Report and Investor Disclosure Document, available on the Company's website, include further details on the use of, and exposure to, derivatives.

Important Information

Worldwide Healthcare Trust PLC (the Company) is a public limited company whose shares are premium listed on the London Stock Exchange (LSE) and is registered with HMRC as an investment trust.

The Company has an indeterminate life, although shareholders consider and vote on the continuation of the Company every five years (the next such vote will be held in 2024).

This financial promotion is issued by Frostrow Capital LLP which is authorised and regulated by the Financial Conduct Authority ("FCA").
